

COMMUNITY RELATIONSHIP POLICY STATEMENT

EESI Contracting ensures the community and the environment are protected through the use of science and engineering based practical techniques following approved environmental and OH&S procedures when remediating polluted groundwater and contaminated soil, managing land issues or undertaking earthworks.

EESI Contracting ensures the community and the environment are protected through the use of simple, science based, practical techniques to evaluate and remediate polluted groundwater and contaminated soil.

EESI Contracting acknowledges the need for good, strong relationships with all communities we are involved with when undertaking our work.

To promote good strong relationships with the community, we will:

- Communicate our Community Relationship Policy and Procedures to all staff, ensuring they understand their responsibility to not just EESI Contracting and our clients, but also to the wider community who may be impacted by our activities;
- Recognise that each community is unique in its needs and expectations and seek regular feedback. Listen to the needs and concerns of all community groups; and
- Search for continual areas of improvement through regular reviews of all our operations and by setting measurable targets to achieve improvement.
- Review and revise our Community Relations Policy and procedures to maintain their relevance
