

ENVIRONMENTAL POLICY STATEMENT

EESI Contracting acknowledges the responsibility for the care of our natural environment.

To promote ecologically sustainable development, we will:

- Communicate our Environmental Policy and Procedures to all staff, ensuring they understand their responsibility to protect our natural environment and promote ecological sustainable development and for continual improvement of our systems for the benefit of the services we provide to our clients and to care for our environment;
- Make the best use of our employees' individual skills in a team environment, and developing their talents through encouraging input on projects and with ongoing training;
- Encourage the application of best practice remediation technologies and methods;
- Provide active support to the development of environmental policies for all aspects of our industries;
- Manage all aspects of our business so as to conserve resources and achieve sustainable development;
- Make continuously improving environmental protection an integral part of the activities of everyone working with EESI Contracting;
- Encourage our clients and suppliers to join us in protecting our natural heritage and to help them achieve their environmental objectives and obligations; and
- Search for continual areas of improvement through regular reviews of all our operations and setting measurable targets to achieve improvement.

EESI Contracting ensures the community and the environment are protected through the use of science and engineering based practical techniques following approved environmental and OH&S procedures when remediating polluted groundwater and contaminated soil, managing land issues or undertaking earthworks.
