

# QUALITY POLICY STATEMENT

EESI Contracting is recognised as an ethical and safe operator, and a market leader in the Australasian environmental remediation contracting field. We aim to provide economic, innovative and sustainable remediation and land management/earthworks solutions to environmental, hydro geological, geological, waste and soil science problems to international best practice standards wherever possible.

We will achieve this objective by:

- Maintaining our EESI Contracting Quality Management System and ensuring we continually strive for areas of improvement through regular reviews of all our operations and setting measurable targets, in order to seek and achieve improvement;
- Communicating our Quality Policy, Objectives and Procedures to all staff, integrating these policies into our business activities and ensuring staff understand their responsibilities for continual improvement of our systems for the benefit of the services we provide to our clients and to care for our environment;
- Making the best use of our employees' individual skills in a team environment, and developing their talents through encouraging input on projects and with ongoing training;
- Meeting or exceeding the standards set by our clients in agreements, contracts, and by regulatory bodies in codes and statutory obligations;
- Embracing new ideas, technology and innovation to improve our company processes and procedures;
- Adding value to our clients by assessing and responding to their needs and;
- Delivering quality and reliable services to provide the platform for developing long term relationships with our clients and suppliers.

EESI Contracting ensures the community and the environment are protected through the use of science and engineering based practical techniques following approved environmental and OH&S procedures when remediating polluted groundwater and contaminated soil, managing land issues or undertaking earthworks.
